

# Variations in Tracking in Relation to Geographic Location (Project Proposal)

Nathaniel Fruchter, Hsin Miao, Scott Stevenson

`{nhf,hsinm,sbsteven}@andrew.cmu.edu`

## I. PROJECT DESCRIPTION

**T**HIS demo file is intended to serve as a “starter file” for IEEE journal papers produced under L<sup>A</sup>T<sub>E</sub>X using IEEEtran.cls version 1.8 and later. [1]

## II. BACKGROUND AND MOTIVATION

Privacy laws have been enacted worldwide with the purpose of protecting internet users’ private information. Privacy laws can be divided into four main models that differ in scope, enforcement, and adjudication: the comprehensive model, the sectoral model, the co-regulatory model, and no-privacy model at all. These models impact how countries view privacy, specifically online tracking and privacy legislation.

## III. RELATED WORK

Overall perspective: studies on jurisdictional differences haven’t really been done in the past

## IV. TIMELINE
